Please be aware that I oppose HR4026. These channels are very helpful to me while I am planning my next route. I am a Truck Driver. and I deliver Food and other perishable items. If these loads are not delivered on time then the load can be turned down, and everyone loses, because the stores will not get their items on time. Then you and your family have to take the time to go to another store or you will just have to do without.

Also if you have XM Radio in your vehicle, You will also not have these channels to listen to and make sure you are going to be safe and not have to lose time while driving.
